Professional Summary

Final-year Computer Science student (graduating 2026) experienced in Java, Spring Boot, and full-stack development. Developed RESTful APIs, scalable microservices, and real-time web apps, achieving over 30% performance gains. Strong in backend architecture, data structures, and problem-solving. Actively seeking backend/full-stack roles.

Education

PAH Solapur University, Pandharpur

B.Tech in Computer Science and Engineering, CGPA: 8.89

2022–2026

Experience

OASIS Infobyte

Java Developer Intern

May–Jul 2024

- Developed CRUD APIs using Java, MVC architecture, and OOP.
- Reduced backend latency by 25% through performance tuning.

Chakravyuh Hackathon

Lead Organizer

Mar–Present 2025

- Coordinated 400+ participant hackathon with team and sponsor management.

Projects

React.js, Node.js, MongoDB

AgriHub – AgriTech Platform

2025

- Built multilingual farmer-vendor platform with chatbot and Razorpay payments.

Spring Boot, MySQL

Inventory Management System

2025

- Developed secure microservices with JWT auth and RBAC.

React, Node.js, Google Maps API

Uber Clone App

2024

- Implemented ride-booking system with GPS tracking and fare logic.

Technical Skills

Languages: Java, JavaScript, C, C++

Frameworks: Spring Boot, React.js, Node.js

Databases: MySQL, MongoDB, Firebase

Other: REST APIs, JWT, RBAC, Git, Docker, Postman

Certifications

2024: Java Development – OASIS Infobyte

2024: Generative AI – Google Cloud Skills Boost

2024: AWS Cloud Foundations – AWS Academy

Leadership and Achievements

Founder – ThinkXLogic Club • Finalist – SGU HackEra 2024

Participant – GDG Hackathon • Flipkart GRiD 6.0 (Level 1)
